# Practice Questions:

## Operators

### 1. Find all products whose price is greater than ₹500.

```
db.products.find({
  price:{
    $gt:500
  }
})
```

### 2. Find all products whose price is less than ₹300.

```
db.products.find({
  price:{
    $lt:300
  }
})
```

### 3. Find all products whose price is exactly ₹699.

```
db.products.find({
  price:{
    $eq:699
  }
})
```

**4.** Find all products whose price is not equal to ₹499.

```
db.products.find({

  price:{

    $ne:499

  }

})
```

**5.** Find products whose price is between ₹200 and ₹1000.

```
db.products.find({

  price:{

    $gt:200,

    $lt:1000

  }

})
```

**6.** Find all products whose stock is greater than 20.

```
db.products.find({

  stock:{$gt:20}

})
```

**7.** Find all products whose stock is less than or equal to 15.

```
db.products.find({

  stock:{$lte:15}

})
```

**8.** Find all Electronics products whose price is greater than ₹500.

```
db.products.find({
```

```
  category:"Electronics",

  price:{$gt:500}

})
```

---

# Logical Operators

## 9. Find products where:

```
db.products.find({

  $and:[

    {price:{$gt:500}},

    {stock:{$lte:20}}

  ]

})
```

- Price is greater than ₹500
- AND stock is less than or equal to 20

## 10. Find products where:

```
db.products.find({

  $or:[

    {price:{$gt:1000}},

    {stock:{$eq:30}}

  ]

})
```

- Price is greater than ₹1000
- OR stock is equal to 30

### 11. Find products where:

```
db.products.find({

  $and:[

    {category:"Accessories"},

    {stock:{$gt:20}}

  ]

})
```

- Category is "Accessories"
- AND stock is greater than 20

### 12. Find products where:

```
db.products.find({

  $or:[

    {price:{$lt:100}},

    {stock:{$lt:10}}

  ]

})
```

- Price is less than ₹100
- OR stock is less than 10

---

## Update Operations

### 13. Update the stock of "Laptop" to 25.

```
db.products.updateOne(
```

```
 {name:"Laptop"},

 {

   $set:{

     stock:25

   }

 }

)
```

## 14. Update the price of "Phone" to 799.

```
db.products.updateOne(

 {name:"Phone"},

 {

   $set:{

     price:799

   }

 }

)
```

## 15. Update the stock to 50 for all products whose price is less than ₹300.

```
db.products.updateMany(

 {price:{$lt:300}},

 {

   $set:{stock:50}

 }

)
```

---

## Delete Operations

### 16. Delete the product named "Tablet".

```
db.products.deleteOne({

  name:"Laptop"

})
```

### 17. Delete all products whose price is less than ₹100.

```
db.products.deleteMany({

  price:{$lt:100}

})
```

---

## Count Documents

### 18. Count the total number of products.

```
db.products.countDocuments()
```

### 19. Count the number of products whose price is greater than ₹500.

```
db.products.countDocuments({

  price:{$gt:500}

})
```

---

## Cursor Methods

### 20. Display products sorted by price from highest to lowest and show only the top 3 products.

```
db.products.find().sort({price:-1}).limit(3)
```
